

TEAM FISHEL HELPS BUILD LEVEL 3 GATEWAY IN PHOENIX, ARIZONA

Team Fishel's Officers and Advisory Board members recently toured the Level 3 Gateway in Phoenix, Arizona with John Rigione, City Director of Operations for Level 3. "Fishel's technicians have done an outstanding job helping us build our gateway here in Phoenix," said Rigione.

The relationship between Fishel and Level 3 was further solidified after Fishel was recently awarded a maintenance contract by Level 3 from San Diego, California to Santa Rosa, New Mexico for repair, maintenance and emergency restoration. "With both inside and outside plant capabilities, Fishel's Teammates are truly an asset to Level 3," Rigione said.

Rigione recently presented Jeff Keeler, Chairman of The Fishel Company, with the Level 3 Vendor Partner Award for helping build their inter-city backbone across the country. "We are truly delighted to become a valued partner with Level 3 and hope to continue this relationship and expand our service capabilities to wherever Level 3 needs us," Keeler said.

Team Fishel has expanded its services

"With both inside and outside plant capabilities, Fishel's Teammates are truly an asset to Level 3," said John Rigione (right), City Director of Operations for Level 3. John recently presented Jeff Keeler with the Vendor Partner Award for Fishel's help in developing Level 3's inter-city backbone countrywide.

to offer full turnkey installation and maintenance service for central office and gateway build-outs. "Our Western Region Technologies Division now provides inside and outside plant fiber pulling, blowing, and splicing services, network equipment installation, and battery back-up installation and maintenance," said Bill Pauley, Vice President of the Western Region.

"Our technicians have the required

skills and expertise to service our customers' needs from start to finish, including gateway design and tenant improvements to overhead ladder racking, equipment trouble-shooting, and power design and maintenance," said Pauley.

Fishel's Technologies Division is rapidly expanding its service capabilities to help customers bring online new long haul routes with built-in redundancy. With the amount of data traffic growing at an exponential rate, the demand for turnkey design, construction, installation, and maintenance services continues to increase.

"Our customers are looking for an end-to-end solution to help them bring online new revenue sources," said John Phillips, Chief Operating Officer of The Fishel Company. "One of Fishel's competitive strengths is our ability to mobilize Teammates and resources quickly and easily to get the job done on time and under budget. Our experienced project managers and technicians are truly helping build the backbone of the Internet."
