Voice, Data, Video, Security and Wireless Networks for a Full Range of High Bandwidth Applications

Team Fishel was founded in 1936 with strong values and a commitment to providing our Customers with a high-quality job at a fair price. Today, more than 1,500 Teammates nationwide work toward this same goal by leveraging their strengths and experience. Team Fishel's office locations throughout the country offer the ability to mobilize quickly to get your job done – on time and on budget.

During the past 20 years our Teammates have installed, terminated, spliced and tested more than 10-million miles of twisted pair, coaxial and fiber optic cable for voice, data, video, security and wireless networks. Our Technicians and Fiber

Splicers have the experience and the tools to make your project appear seamless, while our ongoing Customer support and single point-of-contact allows you to maintain consistency and standardization throughout your business.

Team Fishel has installed more than 6,000 communication networks for the healthcare, financial, education, manufacturing, distribution and government sectors. From custom small business solutions to Fortune 500 companies, Team Fishel along with our strategic partners in the United States and Canada can provide solutions for all your communication needs.
